# Updating concurrent Matlab license in place.

1. Download "network.lic" file from this location https://softy.cac.washington.edu/matlab/2018/

2. Find the license file in your existing installation and replace it with the downloaded file.

# Location of the license file in different operating systems

**Windows:**
License files are stored in the "licenses" folder within the MATLAB installation folder.
If MATLAB is installed in the default location, license files are stored here:
C:\Program Files\MATLAB\R2016b\licenses  (NOTE: Replace "R2016b" with current release number.)

**MacOS:**
License files are stored inside the MATLAB application package.
Right click, CTRL-click, or two-finger click on the MATLAB icon in your Applications folder and select "Show Package Contents."
In the folder that opens up, open the "licenses" folder to see your license files.

**Linux:**
The license files are stored in the MATLAB installation directory:

```
$MATLAB/licenses
```

If MATLAB is installed in the default location, license files are stored here:

```
/usr/local/MATLAB/R2016b/licenses
```

(NOTE: Replace "R2016b" with the current release number.)
